No Conventions For Teachers

At the last session of parliament it was decided to move Thanksgiving Day forward to a date in October as was the custom up until a few years ago and observe November 11th in each year as "Remembrance Day." This has been celebrated heretofore as Armistice Day in conjunction with Thanksgiving, the joint holiday always being observed on the Monday of the week in which November 11th fell. Under the new legislation both days will be observed as public holidays. Thanksgiving has been proclaimed for Monday, October 12th, and Remembrance Day will fall on Wednesday, November 11th. Both will be school holidays.

As a measure of economy the usual district conventions of teachers will be discontinued for this year. School authorities and teachers reading this notice are asked to give it as wide publicity as possible that no confusion may result.

Half Inch of Rain Falls Monday Night

Rain on Monday night contributed one-half inch to the moisture reserve for next year. While it is hard to follow Duncan Marshall's assertion that there will be a big crop all over southern Saskatchewan next year as a result of generous fall moisture, it is easy to admit that prospects here have been wonderfully improved recently. Had there been a reasonable reserve of moisture last spring the crop would have been doubled as a result.

Mrs. W. Ulrich Loses Father

On Wednesday, Sept. 30th, Mrs. W. Ulrich received word that her father, Hans Rue, of Balfour, N.D., was dangerously ill, and left at once for that point, arriving there at 3 p.m. on Friday, while he was still alive and conscious. His death occurred on Saturday, Oct. 3rd, at 2 p.m. Deceased was 77 years old. His immediate family consisted of Mrs. W. Ulrich, Champion; Mrs. Dan Ulrich living in California, and Hans Rue Jr., Funeral arrangements were pending at the time this information was received.

Buffalo Meat To Be Available

At the end of March of this year there were more than 6,000 animals in the Wainwright preserve. To this number has since been added the annual increase of about 20 per cent, with the result that the park is again overtaxed as to its grazing possibilities and thinning out the herd has been decided upon by the National Parks Branch, which controls the buffalo experiments. This is not the first time that it has been found necessary to reduce the Wainwright herd. On several occasions, large numbers of animals have been slaughtered and their products have been marketed.

Sunday Oct. 11th is Thanksgiving Sunday. Don't forget your church.

School Field Day Splendid Success

The second annual field day of the Champion and district schools was held on Saturday Oct. 3. Assisted by excellent weather, the event was conceded a success in every way. The interest taken by the rural schools of the district was particularly gratifying, all nine of them competing.

The honors of the day went to Mr. Furrie's room (grades 7 and 8) which will have the privilege of keeping the large cup, donated by the Champion Consolidated, S.D., for one year. Miss Clarkson's room (grade 10) was a close second, being only four points behind.

Donald Campbell won the greatest number of points in classes D, E, and F, and will be awarded an individual cup donated by the Champion Groceria. Barbara Bastin was the winner of the girls' individual cup donated by McCullough Bros.

In classes A, B, and C, Reta Cennille was the winner of a handsome prize donated by the Champion Pharmacy and Jimmie Ellis of Bussan school won the prize donated by Mr. Frank Clapp.

In the competition for the large cup the following list shows the number of points obtained by each school room.
Mr. Farrier (1, 2, 3) 70.
Miss Clarkson (10) 60.
Miss Cameron (1, 2, 3) 50.
Miss McFall (4, 5, 6) 45.
Miss McNaughton (Fireguard 31.
Mr. Baker (9, 11) 20.
Miss Kay Bussan 28.
Mr. Whitmarsh Bow Valley 21.
Miss E. McNaughton Yale 12.
Miss Patterson Harmony 9.
Miss Fleming Bussan 8.
Miss Jensen Washington 7.
Miss Jensen Washington 7.
Miss Jensen Washington 7.
Miss Jensen Washington 7.
Miss Jensen Washington 7.

The winners of the special awards in their respective classes were as follows:

CLASS A—Jimmie Ellis.
CLASS B—Jackie Collins.
CLASS C—Frieda Summers.
CLASS D—Richard Latiff.
CLASS E—Donald Campbell.
CLASS F—Donald Campbell.
CLASS A—Jimmie Ellis.
CLASS B—Pauline Fisher.
CLASS C—Eileen Higgins.
CLASS D—Joan Bastin.
CLASS E—Barbara Bastin.
CLASS F—Barbara Bastin.

The following is a detailed report of the winners of the various events in the Champion School Field Meet:
CLASS A—BOYS
25 yard dash—Jimmie Ellis, Glen Rhodes, Jesse Matlock.
Potato race—Jimmie Ellis, Budle Waise, Karl Iverson.
Three-legged race—Reginald Alcock and Freddie Fleming, Jimmie Carlson and Jimmie Ellis, Budle Waise and Teddy Giffey.
Sack race—Hubert Warren, Budle Waise, Karl Iverson.
Standing broad jump—Richard Bach, Jimmie Ellis, Glen Rhodes.

CLASS A—GIRLS
25 yard dash—Reta Cennille, Laura Hagg, Marge McDougall.
Potato race—Reta Cennille, Laura Hagg, Marge McDougall.
Three-legged race—Marge McDougall and Marjorie Dittie, Reta Cennille and Linda Cennille, Rosie Doyle and Marie Moffatt.
Sack race—Reta Cennille, Linda Cennille, Laura Hagg.
Hopping race—Reta Cennille, Laura Hagg, Rosie Doyle.

CLASS B—BOYS
Wheelbarrow race—Arnold Bond and Jackie Collins, Olive Hatcher and Forbes Golden, Bonar Bain and Earl Mueller.
50 yard dash—Forbes Golden, Walter Rhodes, Howard Hagg.
Standing broad jump—Walter Rhodes, Victor Lebusack, Teddy Davies.
High jump—Jackie Collins, Forbes Golden, Jimmy Watt.
Ball throwing—Howard Hagg, Jackie Collins, John Carlson.

CLASS B—GIRLS
Potato race—Pauline Fisher, Yvonne Griffin, Eva Latiff.
40 yard dash—Yvonne Griffin, Pauline Fisher, Eva Latiff.

NOTES AND COMMENT

The American Federation of Labor and the Canadian body of the same affiliation have given notice that they will fight against any reduction of wages, to the last ditch and further, and in addition add a threat that such reductions would cause unrest among the people affected. The principal argument advanced is that the lowering of purchasing power by the reduction of wages would more than offset any benefit to be gained. In fact one would be led to believe that if the wages paid these particular people were doubled the added purchasing power would insure good times at once. When incomes were demanded by the unions the advanced cost of living was one of the foremost arguments used, but the decreased cost of living does not seem to be worth consideration. In fact the attitude of organized labor is absolutely selfish. Other people may starve and recovery from the present depression may be prolonged indefinitely as far as they are concerned, and the inconsistency of their arguments without the suggestion of "arrest," which naturally included strikes and the further paralysis of business, is an indication that they do not propose to meet their due share of the difficulties but will shoulder them upon anybody they can, not even omitting other classes of labor. No wonder railways are forced to close their shops and curtail the number of men they employ to a minimum, when they are forced to pay wages out of all comparison to what producers are receiving. The beginning of recovery will be reached when these things are adjusted.

A Miracle Man has been discovered at Williamsburg, Ont., in the person of Dr. M. W. Locke, and patients from the laborer to the Governor-General are included among his patients. From Florida to the western Canadian provinces they flock to his door in hundreds. All the treatments are given to the foot, where, according to the doctor "the posterior tibial nerve gets caught in the arch of the foot, causing deposits of uric acid in the joints. Release of the nerve stops the deposits of acid. That's all. The trouble frequently clears up." Naturally some remarkable cures are attested to by those benefited and the crowd of patients is constantly growing. The charge is one dollar per treatment, which is a matter of but a few minutes.

Vulcan ratepayers recently entertained members of their council at a meeting called by petition. Constantly increasing taxes in the face of present conditions was the bone of contention, although many other matters were brought up. It is the easiest thing in the world for a council to spend more money than the ratepayers can afford to pay and the continuance of heavy expenditures

after 1929 has naturally resulted in enormous arrears, which has increased the burden and prevented any reduction in levies. Vulcan is by no means the only place where municipal and school expenditures look more as though a boom was in progress depression the world has ever seen.

Feeding Pullets For Winter Egg Production

(Experimental Farms Note)

During the late fall and winter months as a general rule egg prices are very much higher than at any other time throughout the year. Every poultry raiser should realize, therefore, that if he gets good egg production then it will pay him well. Fall and winter produce is the keynote to greatest profits. As the great bulk of the adult birds will be resting and undergoing moulting process during the fall and winter months, the pullets are left essentially as the only source of fresh eggs at that time. Thus, the chief concern of the poultry keeper should be to give the pullets the best possible attention in order that they may produce to their maximum capacity. Pullets should not lay until they are mature, and for this reason poultrymen should aim to have their young stock mature before the cold weather begins in the fall. Early hatched pullets that start to lay in October or November are the ones to keep for egg production. It is the early hatched and fully matured pullets in good healthy condition that will produce the eggs during the late fall and winter months. Pullets require careful feeding during the fall and winter to secure profitable egg production. They relish and do better on a variety of feeds providing these are palatable. Laying pullets should be fed a ration consisting of scratch grains and mash, meat food, green food, mineral food, grit and drink. At the Dominion Experimental Station Lacombe, Alberta, a dry mash mixture kept in hoppers constantly before the flock, is made up of equal parts of bran, shorts, barley meal and flax ground out to which is added about twenty per cent beef scrap. Milk replaces the meat scrap when the flock can have access to all they will drink. When milk is available only part of the time about ten per cent beef scrap is added to the ground feed mixture. To this mixture is added 3 per cent bone meal about one per cent fine table salt and 2 per cent cod liver oil. A home-mixed scratch grain consisting of equal parts of wheat, oats and barley is scattered in a deep litter of straw in the morning and again in the afternoon, a heavier feed being given in the afternoon, than in the morning. This induces the birds to exercise. Grit and oyster shell are available in hoppers and green feed is supplied either by alfalfa leaves or mangles, carrots, cabbage and sprouted oats.

Dance Supreme, Friday night.

Champion, Alberta

To Be or Not To Be ? That is the Question.

From various causes payments on subscription account to The Chronicle during the years 1929 and 1930 were almost negligible, considering the total. That is the reason that in one of the hardest years experienced in the district we are forced to urge payment by those who are able to pay.

Receipts from all other sources have dwindled with the advancing depression to the vanishing point, so that if we are to continue to operate the plant part of the \$1,200 subscription arrears on our books must be paid.

We would offer a premium for immediate payment but the price of The Chronicle, \$1.50 per year, is the lowest of any rural weekly in the province as far as we know, and does not provide room for either reductions or premiums. If you cannot pay us all you owe, part of it would be equally acceptable. Remember, we are only asking those to pay who are able to pay. A call at the office would be appreciated if it was only to convey the information that you couldn't pay. It requires a touch of misfortune to develop our kinship.

And, if you want to put us in the height of good humor when you call, just say:

"I saw your ad. in The Chronicle."

Saskatchewan Sodium Sulphate Deposits Are Fast Becoming Of Major Importance To Province

One of the most interesting and important developments of mining in Western Canada recently, says the Manitoba Chamber of Mines, has been the activity in connection with the big sodium sulphate deposits of Saskatchewan. Once looked upon as "salt sloughs" of no economic value these Saskatchewan deposits are already becoming of major importance. Shipments in 1930 totaled 3,571 tons valued at \$203,847, compared with 5,018 tons valued at \$64,112 in 1929.

The Horseshoe Lake Mining Company at Orkneyton, the principal producers, are shipping the sodium sulphate to the International Nickel Company's plant at Copper Cliff and to the sulphate-pulp mills. The Horseshoe Lake deposit is estimated to contain over 9,000,000 tons. Shipments average almost three cars of sodium sulphate per day; and, in addition, besides other supplies, the operation requires the use of three cars of coal per day, the coal being used to drive off the moisture content.

In 1929 imports of nitrate cake used in nickel refining in this province amounted to 80,800 tons. It would require 45,000 tons of the natural sodium sulphate from Saskatchewan to manufacture this quantity of nitrate cake. In addition, in 1929, salt cake consumed by the pulp and paper mills totaled 44,822 tons. It appears probable, says same authority, that in 1931 much more of the pulp mill requirements will be supplied from Saskatchewan deposits.

The development of the "alkali sloughs" of Saskatchewan dates from the time of the war, when there was an exceptional demand for new sources of potash. Investigations carried on at that time demonstrated that there was an abundance of potash, but some of the investigators pursued the matter further and found that there was an abundance of sodium sulphate. The market for this product has been successfully developed in recent years, and the sales field is increasing. Sodium sulphate was first used as a medicine under the name of Glauber Salts. More recently demand has arisen for it in a number of industries. These include the textile industry, the manufacture of window and plate glass, the dye and textile industries, tanning preparations, electro-chemistry and electro-plating and the explosives industry.

Some of the more important deposits of sodium sulphate listed in a review of the situation by the Manitoba Chamber of Mines are the Horseshoe Lake deposit, the Muskeg Lake deposit and the Frederick Lake deposit. It is estimated by the Chamber of Mines that there are very large quantities of sodium sulphate available. Deposits lend themselves to ready measurement and those gauged to date total over 100,000,000 tons, considering the other large number of known, but as yet unmeasured deposits, there is not a doubt that Saskatchewan has at least 250,000,000 tons. Many fine individual occurrences running from 3,000,000 to 4,000,000 tons up to 10,000,000 and 15,000,000 tons are within easy and economic access.

Butter Exports Grow

Heavy Increase In Amount Of Butter Exported Is Shown

That Canada is definitely on an export market basis in so far as butter is concerned is increasingly apparent with each succeeding year in the market report of the Dominion Dairy and Cold Storage Branch. Exports of butter so far this season, since May 1, total 165,462 packages, compared with 3,066 packages for the corresponding period last year. Also evident is a swing of butter-far from cheese to butter. Cheese exports last year, May 1 to August 29, 1931, totaled 349,100 boxes, as compared with 374,457 boxes for the same period last year.

The turn of a woman's head often turns a man's head.

"How can you have the nerve to look me in the face?"
"Well, sergeant, one can get used to anything."—Gulliver, Madrid.

W. N. U. 1910

Was Once Called "Shaddock"

Captain Of That Name Discovered Grapefruit In Polynesian Islands
Grapefruit, which some "low brow" columnist might refer to as a "juicy" logo of discussion, is certainly gaining a place in the world's cuisines of grapefruit to Great Britain and Europe were recently reported to be making strong gains each year, while on this continent it is said to be a strong rival of the orange at breakfast time.

As it happens the grapefruit has no more to do with, or is related to, the grape, than the man in the moon is to Limburger cheese. Its original name was the "shaddock," after it was discovered by George Shaddock in the Polynesian Islands. Because it grows in clusters, and for no other reason, it was forced to get along under its present title. Horticulturists having been trying in vain to rechristen it "pomelo."

Back in 1900, 1,000,189 boxes of the fruit were grown. To 20 years the number increased to 9,218,000 boxes. A native of the East Indies, it was brought to the West Indies, Florida and California, and has spread to Arizona and Texas. California has 8,000 acres of bearing trees. Arizona has 2,820 acres, Florida has 75,000 acres, while Texas, the State of oil derricks, has 10,192 acres of bearing orchards. Each State has many trees, on-bearing, as yet.

Grapefruit, indeed, it might be said, is getting more and more in the public eye.

Trade Ship From Canada

Will Leave Halifax In January On Trip To West Indies

The West Indies were the first lands sighted by Columbus in his voyage of discovery in 1492. For years writers have made them the scene of tales of piracy and adventure and in more recent times of stories of yodoodism and romance.

When, however, the R.S. New Northland, sails from Halifax on January 8, 1932, the passengers will not be going in search of buried treasure, but will endeavour to seek treasure of a more practical kind in the form of increased trade for Canada and more friendly relations between this country and the smaller units of the British Empire which they will visit.

The Canadian Manufacturers' Association, the Canadian-West Indian League and the Clarke Steamship Company are co-operating in organizing the cruise to Bermuda, the British West Indies, British Guiana, the Bahamas and Cuba.

The lounge of the ship will be divided into booths for the exhibition of Canadian manufactured goods and other products of this country. Further space for exhibits will be provided between decks and in the state-rooms.

The cruise will occupy about two months and between the time of leaving Halifax and the date of return, March 4, 15 ports will have been visited. At none of these ports will the party remain less than one day.

In addition to the organizations sponsoring the tour, support is being given by the Board of Trade and Commerce of the United Kingdom.

King Crowned Annually

Ceremony Observed Every Year, Before People In Uganda

The native king of Togo, Uganda, was recently crowned. But he is not a new king. The coronation is an annual event. The ceremony takes place on top of King Hill, where King George Rukidi meets his chiefs and people. The king, who has visited England and been crowned at Buckingham Palace, is 6 feet tall. The king's coronation robes include a great cowrie shell headdress, with a long, silky-white colubine monkey skin beard attached. On top of his enormous headdress is placed the actual crown, which is a small red cap. The most impressive part of the ceremony comes when the king walks alone into a small hut, before which, amid silence, he stands motionless and looks across his country for three minutes.

After the ceremony the king changes into a European suit, and the Princess and the Queen Mother receive European visitors, while the king talks in English to his guests and a football match proceeds outside.

The only absolute monarchies are the Empire of Abyssinia, the Kingdom of Siam and the Empire of Morocco.

There are about 7,280 hospitals in the United States. Of these 700 are in New York State.

Will Film The Aurora Borealis

Three explorers and scientists, representing the United States Government, arrive at Churchill, equipped with motion picture cameras prepared to photograph the aurora borealis.

In charge of the party is Capt. F. M. Williams (on ship). His companions are (left) A. Louis, assistant scientist and camera man, and (right) Robert Marshall, color expert. At Manitoba's ocean port they found the first aurora borealis. They plan to photograph the events of this historic occasion in true colours.

Photo: Canadian National Railways.

The Present Catalogue

World Is Passing Through No Ordinary Trade Depression

It is now two years since hard times ratched this country, and it is no longer open to serious question that we are in the midst, not of an ordinary trade depression, but of one of the great upheavals and readjustments of modern history. A dozen governments have been brought down by it. In all the five continents it has upset the normal expectations of men by which they had been planning and making, buying and selling, borrowing and lending. In all the vast confusion which has resulted one thing at least is certain—the world, when the readjustments are made, can not and will not be organized as it was two years ago. The post-war era of the Nineteen Twenties is over and done.

As individuals living through this tremendous experience most of us know this with our heads and feel it in our bones. But as a people, in our corporate capacity, we have not yet begun to acknowledge the reality of the change and to formulate our national purposes for dealing with it. As a nation we are still groping, still, where we stood two years ago, refusing in any responsible fashion to consider whether the increasing political insecurity of the world (which is reflected in mounting armaments), the increasing obstructions to the free flow of commodities, the debts and reparations are a probable foundation for the restoration of prosperity. Thus far our national response has been to stand pat in all such matters, and it is believe that in sixty days, ninety days, or six months, the dove would return with the olive branch, the floor would recede, and business would go on as usual. —Walter Lippmann, in the New York Herald-Tribune.

Meat Packing Enjoys Rating As One Of Leading Manufacturing Industries Of The Dominion

Hard Work Not Responsible Increase In Egg Production Due To Better Hens

The Canadian Government Information Bureau falls into a regrettable error, declares the New York Sun, editorially, "when it says that hens in Canada are working much harder than they did ten years ago." It bases this unfortunate declaration on the fact that the average egg production of 6,010 hens in 1929 was 122.1 eggs, while in 1910 it rose to 178 eggs for each bird.

"The fact is that the 1930 hens are better bred than the 1920 hens were. The flocks have been improved by persistent, intelligent culling. The hens of non-productive strains have been reduced in number; the good layers have been increased in number. Year after year the breeders have competed for higher marks, and the eggs of their prize-winning and prize-deserving pens have been eagerly sought by poultry men."

As the hens have become more numerous the number of eggs to the hen rose, but this does not mean that the hens of today work harder than their ancestors did. They merely live up to the more widespread barnyard understanding of the fact that to be a hen is to produce eggs. A hen must lay an average of 150 eggs a year each, and the contemporary Canadian hen, conscious of their responsibility as key workers in a great and profitable industry, make play of their task, knowing not the meaning of the phrase 'hard work.'"

Soldier Settler's Victory
Awarded Alberta Championship For Best Field Of Grain
Peace hath her victories no less renowned than war, as James Hissett, of Edmonton, near Red Deer, a former Canadian soldier in the Great War has demonstrated. He has been awarded the championship for the best field of Alberta for this year's best field of standing grain.

The prize-winning field was ten acres of Marquette wheat grown on breaking, and it was first entered in the Field Crop Competition of the Red Deer Agricultural Society, where it won first prize. It is expected to yield 50 bushel to the acre. This year Hissett had 777 acres in crop of which 610 acres were sown to wheat.

New Glass Is Flexible

A flexible glass has been invented in Europe. It is made largely from vegetable products. It has every appearance of genuine glass and does not look in the least like celluloid; yet it is said a sheet of it can be rolled up as easily as a piece of stiff paper, and it can be dropped or twisted or bent without injury.

"A bachelor has left his fortune to a woman who refused him."
"And then you say we men are not grateful!"

Will Train Girls For Domestic Service

Calgary Proposes To Establish School For Unemployed

A domestic training school for unemployed girls will be established here shortly, according to plans announced by the unemployed girls' committee. The proposal is said to have the support of Government authorities and financial aid from both Provincial and Federal relief funds is anticipated.

The committee pointed out that domestic service is almost the only field where girls can still find employment, but many of these who were formerly in stores, offices and factories are without knowledge of cooking and cannot give satisfactory service.

By providing a body of highly-trained girls, the committee believes better benefits will be realized both by higher earning capacity and in later life, when the girls have homes of their own.

New Glass Is Opaque

Glass that is opaque from the outside recently was demonstrated in the windows and windshield of an automobile. Passengers and driver can see perfectly from the inside of the car, but the appearance from the outside is that of a mirror. The only difference from ordinary glass from the inside is a slight bluish tinge.

Where The Money Is

Who says the people are short of money? At the close of the month of June there were more than \$24,000,000 to the credit of depositors in the Post Office Savings Bank and deposits all but equalled withdrawals during the month in question. Much the same story is related by other savings banks.

Going out to hunt for butter is an ordinary experience in Trinidad, where the natives catch fat young "bull birds" and melt down a supply of butter.

Hard Work Not Responsible

Increase In Egg Production Due To Better Hens

The Canadian Government Information Bureau falls into a regrettable error, declares the New York Sun, editorially, "when it says that hens in Canada are working much harder than they did ten years ago." It bases this unfortunate declaration on the fact that the average egg production of 6,010 hens in 1929 was 122.1 eggs, while in 1910 it rose to 178 eggs for each bird.

"The fact is that the 1930 hens are better bred than the 1920 hens were. The flocks have been improved by persistent, intelligent culling. The hens of non-productive strains have been reduced in number; the good layers have been increased in number. Year after year the breeders have competed for higher marks, and the eggs of their prize-winning and prize-deserving pens have been eagerly sought by poultry men."

As the hens have become more numerous the number of eggs to the hen rose, but this does not mean that the hens of today work harder than their ancestors did. They merely live up to the more widespread barnyard understanding of the fact that to be a hen is to produce eggs. A hen must lay an average of 150 eggs a year each, and the contemporary Canadian hen, conscious of their responsibility as key workers in a great and profitable industry, make play of their task, knowing not the meaning of the phrase 'hard work.'"

Experiment To Be Tried

Provincs Of Alberta Decide To Attempt Strip Production

"Briquet farming" as a means of moisture conservation will be tried on a large scale this year. The Alberta Government Farm at Youngstown, according to J. F. Andrew, assistant deputy minister of agriculture, will be divided into strips.

Alternate strips, ten rods in width, will be seeded and summer-fallowed, and the following year the strips will be cropped. The strips on which the crop is growing draw a considerable amount of soil moisture from the resting lands, the stubble strips during the winter check soil drifting, and the necessity of keeping the whole field fallowed every second year is avoided.

A special four-year rotation, including oats, sweet clover, summer-fallow and wheat is also being undertaken as an impetus to mixed farming and live stock production in the so-called dry area of the province.

Will Train Girls For Domestic Service

Calgary Proposes To Establish School For Unemployed

A domestic training school for unemployed girls will be established here shortly, according to plans announced by the unemployed girls' committee. The proposal is said to have the support of Government authorities and financial aid from both Provincial and Federal relief funds is anticipated.

The committee pointed out that domestic service is almost the only field where girls can still find employment, but many of these who were formerly in stores, offices and factories are without knowledge of cooking and cannot give satisfactory service.

By providing a body of highly-trained girls, the committee believes better benefits will be realized both by higher earning capacity and in later life, when the girls have homes of their own.

New Glass Is Opaque

Glass that is opaque from the outside recently was demonstrated in the windows and windshield of an automobile. Passengers and driver can see perfectly from the inside of the car, but the appearance from the outside is that of a mirror. The only difference from ordinary glass from the inside is a slight bluish tinge.

Where The Money Is

Who says the people are short of money? At the close of the month of June there were more than \$24,000,000 to the credit of depositors in the Post Office Savings Bank and deposits all but equalled withdrawals during the month in question. Much the same story is related by other savings banks.

Going out to hunt for butter is an ordinary experience in Trinidad, where the natives catch fat young "bull birds" and melt down a supply of butter.

Slauhtering and meat packing is one of the leading manufacturing industries of the Dominion

Butcher work in Canada is rated first in the list in order of value of production and is preceded by the pulp and paper industry only. On the basis of the value of materials used, it comes first in the list. There were 74 slaughtering and meat packing plants in operation in Canada last year, which was an increase of two over 1929. Production last year, however, was lower than in 1929, which was the record year in the industry since the post-war boom.

The value of production of the slaughtering and meat packing industry in 1930 was \$164,029,903, while the value in 1929 was \$185,842,902. Butcher work in Canada in 1930 amounted to \$164,029,903, which sum land, buildings and machinery accounted for \$27,788,505, materials produced and supplied for \$15,442,178, and cash and accounts and bills receivable for \$12,538,253.

The number of animals slaughtered in Canadian plants in 1930 was 3,987,810. Of these between December 27, 1929 and December 31, 1930, 2,300,630 and calves, 205,884. The dressed weight of the animals slaughtered amounted to 724,024,410 pounds and the value of the dressed weight was \$15,442,178. Decreases from the preceding year were shown in the number, weight and value of sheep and hogs slaughtered, while increases were shown in calves. Increases are reported in the number and weight of sheep and lambs slaughtered, but there was a decrease in the cost value. Dressed meat purchased by the plants in 1930 in a fresh or partly cured state amounted to 724,024,410 pounds valued at \$11,011,881, and the poultry used showed a total of 6,240,959 pounds with a value of \$1,468,953.

The main centre of the slaughtering and meat packing industry in 1930 was in Ontario, where 24 establishments were operating. In the Province of Quebec the number was 17; in British Columbia had nine; New Brunswick eight; Manitoba and Alberta six each; Saskatchewan, three; Prince Edward Island, two; and Nova Scotia one. The plants generally are of large capacity, only 16 of them in 1930 having a product valued at less than \$100,000 or over numbered 35, with a product valued at from \$100,000 to \$1,000,000 numbered 20, while those with a product valued at \$1,000,000 or over numbered 35.

The consumption per capita of beef and pork in the Dominion in 1930 is reported to have been less than in 1929, while there was an increase in the consumption of mutton and lamb. The consumption of beef per capita last year is placed at 67.6 pounds, that of pork at 74.2 pounds, while that of mutton and lamb was 7.11 pounds. In the previous year the consumption of beef per capita was 68.13, pork 81.52, and mutton and lamb 7.03 pounds.

Silo Saves Surplus Crop

Can Be Kept For Years When Feed Is Scarce

A silo on a live stock farm may be helpful as a storage place for immature crops in a poor crop season and as a store for surplus crops in good years, according to J. B. Pitch, Kansas State College. Experience has demonstrated that immature crops dried beyond the stage of saving because of the lack of moisture, can best be conserved by putting in the silo. In years of surplus roughage, a silo can be justified to hold silage over for lean years.

Frozen Fish Sent Across Canada

The first regular shipments following the experimental shipment of frozen fish from the Northwest Territory, comprising seven cars from Prince Rupert, passed through Winnipeg a few weeks ago over the Canadian National Railway enroute to the east for consumption in the United States and Eastern Canada.

THE HOUSE OF DREAMS-COME-TRUE

BY MARGARET FEDLER

Author of "The Splendid Days of the Hermit," "Hodder & Bougton, Ltd., London."

CHAPTER I.—Continued.

"It is as an insurance of good health that I come," he informed Jean gravely.

"Oh, yes, we are not here merely for pleasure—come see ours!"—Madame de Varigny gestured smilingly towards a merry party of men and girls who had just come in from hunting and were stamping the snow from off their feet and hats. Little outbursts of chaff and laughter. "We are here just as last year, Peterson!"—the suddenly manly quality of her voice implied just the right amount of sympathetic recollection—"so that non pauper mari may assure himself of yet another year of health."

The faintly ironical gleam in her eyes convinced Jean that, as she had shrewdly begun to suspect, the little Count was a "moralist," and once again she found herself wondering what could be the circumstances responsible for the union of two such distinctly personalities as the high-bred, hypochondriacal little Count and the rather splendid-looking but almost certainly phlegm-born woman who was his wife.

She intended, later on, to ask her father if he would supply the key to the riddle, but he had contrived to drift off during the course of her conversation with the Varignys, and when at last she found herself free to join him, he had disappeared altogether.

She thought it very probable that he had gone out to watch the progress of a skiing match to which he had referred with some enthusiasm earlier in the day, and she should have little at the characteristic way in which he had extricated himself, at her expense, from the inconvenience of his unexpected rencontre with the Varignys.

But, two hours later, she realized that once again his superior wit and animation had deceived her. From her window she saw him coming along the frozen track that led from the hillside country, and for a moment she hardly recognized her father that suddenly shrank, huddled figure of a man, stumbling down the icy path, his head thrust forward and sunken on his breast.

Her first imperative instinct was to go and meet him. Here, while being asked with the longing to let him feel the warm rush of her sympathy, to assure him that he was not utterly alone. But she checked the impulse, recognizing that he had no use for any sympathy or love which she could give.

She had never really been anything other than exterior to his life, outside his happiness, and now she felt intuitively that he was now with her remain equally outside the temple of his grief.

CORNS

LIFT OFF

Pain Stops!

An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful—yes, it is, but that is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any drugist for 35c.

PUTNAM'S

W. N. U. 1910

He was the type of man who would bitterly resent the knowledge that any eyes had seen him at a moment of such utter, pitiable self-revelation, and it was the measure of her understanding that Jean waited quietly till he should choose to go to her.

When he came, he had more or less regained his customary poise, though he still looked strained and shaken. He addressed her abruptly.

"I've decided to go straight on to Marseilles and sail by the next boat, Jean. There's one I can catch if I start at once."

"At once?" she exclaimed, taken aback. "You don't mean—today?"

"Yes, this very evening. I find I can get down to Marseilles in time for the night mail! Then, answering her unspoken thought: "You'll be quite all right. You will be certain to hear from Lady Anne in a day or two, and, meanwhile, I'll ask Madame de Varigny to play chaperon. She'll be delighted—with a flash of the ironical humour that was never long absent from him.

"Who was she before she married the Count?" queried Jean.

"I can't tell you. She is very reticent about her antecedents—probably with good reason—smiling grimly. "But she is a big and beautiful person, and our little Count is obviously quite happy in his choice."

"She is rather a fascinating woman," commented Jean.

"I am not so sure, as a friend rather than an enemy. I don't know anything about her, but I wouldn't mind wagering that she has a dash of the French in her."

"She will look after you all right till Anne Brennan writes."

"And if I let you go?" suggested Jean. "Or suppose Lady Anne can't have me? We're rather taking things for granted, you know."

"I don't know, but I'll make my own arrangements,"—vaguely, "I'll let the next boat go, and stay in Paris till I hear from you. But I can't wait here any longer."

He paused, then broke out hurriedly.

"I ought never to have come to this place. It's haunted. I know you'll understand—you always do—why I understand, I think you quite—why I must go."

And Jean, looking with the clear eyes of untroubled youth into the dead, grey-streaked face, was suddenly conscious of a shrinking fear of that mysterious force called love, which can make, and so swiftly, terribly unmake, the lives of men and women.

CHAPTER III.

The Strange On the Ice

"And this friend of your father's you have not heard from her yet?" Jean and Madame de Varigny were breakfasting together the morning after Peterson's departure.

"No, I hoped a letter might have come for me by this morning's post. But I'm afraid I shall be on your nerves for some time,"—smiling—"But it is a pleasure!" Madame de Varigny reassured her warmly. "My husband and I are here for another week, say two more. After that we go on to St. Moritz. He is suddenly discontented with Montevideo. If, by any chance, you have not heard from Lady-Lady—I forget the name."

"Lady Anne Brennan," supplied Jean.

"A curiously concentrated expression seemed to fit for an instant across Madame de Varigny's face, but she continued smoothly:

"Mada, out—Lady Brennan, then, if you have not heard from her by the time we leave for St. Moritz, you must come with us. It would add greatly to our pleasure."

"It's very good of you," replied Jean. She felt frankly grateful for the suggestion, realizing that if, by any mischance, the letter should be delayed till then, Madame de Varigny's offer would considerably smooth her path. In spite of Clot's decision that she must join him in Paris, should Lady Anne's invitation fail to materialize, she was well aware that he would not greet her appearance on the scene with any appearance of pleasure.

"I suppose—the Countess was speaking again—I suppose Brennan is a very frequent—a common name in England?"

The question was put casually, more as though for the sake of maintaining conversation than anything else, yet Madame de Varigny seemed to wait the answer with a curious anxiety.

"Oh, no," Jean replied readily enough. "I don't think it is a common name. Lady Anne married into a junior branch of the family, I believe," she added.

"That would not be considered a very good match for a peer's daughter, surely?" hazarded the Countess.

"A junior branch?" I suppose there

was a romantic love-affair of some kind behind it?"

"It was Lady Anne's second marriage. Her first husband was a Torment—one of the oldest families in England," Jean spoke rather stiffly. There was something jarred about the perfunctory catchword.

Madame de Varigny's lips trembled as she put her next question, and not even the dusky rings of lashes could quite soften the sudden tense gleam in her eyes.

"Torment—this?" she pronounced the name with a certain emphasis, evidently finding the unusual English word a little beyond her powers.

"What a curious name! That, I am sure, must be uncommon. And this Lady Anne—she has children—sons?"

"Oh, yes. She has two sons."

"Indeed?" Madame de Varigny looked interested. "And what are the sons called?"

Jean regarded her with mild surprise. Apparently the subject of nomenclature had a peculiar fascination for her.

"I really forget. My father did once tell me, but I don't recollect what he said."

A perceptible shade of disappointment passed over the other's face, then, as though realising that she had exhibited a rather unbecoming curiosity, she said deprecatingly:

(To Be Continued.)

Chinese May Eventually Cover Earth

Scientist of the British Association for the Advancement of Science

warning words of the growing strength of the Chinese race.

Professor F. A. Crew of Edinburgh, Scotland, said the Chinese were swarming and conquering in peaceful migration, vast numbers in the Pacific.

"This migration," Professor Crew said, "is an event which surpasses in importance anything we have ever been prosecuted in China, for we are being given evidence that of all human stocks the Chinese is perhaps most adaptable."

"They seem to breed and develop normally anywhere and everywhere. This is the case then indeed the Chinese will inherit the earth."

Professor John Huxley, distinguished biologist, described birth control as a new phenomenon of the first magnitude which was likely to affect all countries in the coming century.

The result, even in countries where over-population threatened, in the next 100 years would probably bring danger of depopulation, he declared.

Professor A. M. Carr-Saunders of Liverpool said the population of the world had increased four-fold in 300 years. He predicted the races of European descent would stop increasing within three generations.

The Crisis in Britain

The Causes Leading Up To The Financial Depression

Let no man think that the step will take us out of the wood, or that by one plunge we can reach the upper air after our long and weary descent to Averna. The causes go far back and they will not be rooted out by digging on the surface only. They go back to the War, to the years of destruction and consumption; of production not of wealth but of weapons of our war debts and their results, one of which is the storing of gold in a country which refuses to take goods in payment of debt; to the effect of this on the world's trade, when prices fall and fall, in part because producers long to sell their commodities at any price in a market that refuses to buy them. Nearer home are causes which we ought to have controlled, consuming more than we produced, what is called living above our income.—London Spectator.

For years Mother Graves' Worm Expeller has been ranked as a reliable worm preparation and it always maintains its reputation.

Ship Tomatoes To Hong Kong With a view to popularizing British Columbia fruit in the Orient, a trial shipment of canned tomatoes, grown in the province, left on the S.S. Empress of Asia for Hong Kong and Shanghai recently, the same liner carrying, also, a cargo of canned strawberries for Hong Kong.

Find Prehistoric Remains

Skeleton of Man of Giant Proportions Unearthed in British Columbia

Rhologists and archaeologists in British Columbia are intensely interested in the discovery, by a road gang, of a group of skeletons near Vernon.

It is believed that they may prove to be the remains of a race that preceded the native races that met the first coming of the white men of the interior valleys 120 years ago.

The particular skeleton that is causing speculation is that of a man. It measures six and one-half feet, but the man, in life, would have measured at least one inch or possibly two inches more.

Six skeletons were found in all, but of different shape to those discovered in other excavations in the area.

The find was made by a road gang at work on the Vernon-Kamloops highway, about four miles out of the latter place.

One was that of a woman, three of boys in their 'teen age, and a fifth of a young man possibly of 20. Nearly all were found in the same place.

In close association with the human remains were found stone implements, differing but little from the type of implements used by natives on the arrival of the white man. This, however, does not give any indication as to the period at which the aborigines lived as there is practically no difference known to exist that definitely marks phases of the Stone Age west of the Rockies.

Among modern Indians there are legends of the existence of a race of giants who inhabited the country before the coming of the peoples of Mongolian extraction.

THE RHYMING OPTIMIST

By Aline Michaels

THE CHALLENGER

At last there dawns a day when strength drifts out.

When every energy and impulse wanes. When high desire is gone and creeping doubt.

Brings full fears and shadows in its train.

Then rises in man's soul to meet that hour

A force surpassing any he has known. A calm security, a certain power. Not to be turned aside or overthrown.

This is its part; to nerve his soul, stretched hard.

Until it grasps, unflinchingly, the cup of life. To back the War, to the years of destruction and consumption; of production not of wealth but of weapons of our war debts and their results, one of which is the storing of gold in a country which refuses to take goods in payment of debt; to the effect of this on the world's trade, when prices fall and fall, in part because producers long to sell their commodities at any price in a market that refuses to buy them. Nearer home are causes which we ought to have controlled, consuming more than we produced, what is called living above our income.—London Spectator.

Supreme despite defeat, man then must be Himself a challenge to Divinity!

Egg Exports Higher

British Market For Canadian Product Better Than Last Year

The financial situation in Great Britain is not expected to have any immediate effect on export of eggs from Canada.

The bulk of the contracts for exports of eggs to Britain are completed by this time of the year, says the recently reported of the Department of Agriculture, with practically all sales on a basis of Canadian currency.

In recent years export of eggs to Great Britain has been declining steadily, due to increased consumption in Canada, but the current year has witnessed some revival which promises to be substantially above 1930.

Soviet Matches

The Brandon Sun Says it would be interesting to know just how Russian products can enter Canada in the face of the ordinary customs and inspections. There should be some method of protecting Canadian industries from soviet competition. Nevertheless matches made in Russia and marked with the soviet brand can easily be purchased in Canada. They are on sale in Brandon. There are several match factories in Canada.

Rural electric power lines can be run underground cheaper than they can be strung on poles, a recent analysis of costs has shown.

Not Peculiar To London

Well-To-Do People Taking Jobs Away From Needy Ones

We are interested in reading that the Hon. Phyllis Astor, only daughter of Viscount and Viscountess Astor, is one of the latest recruits to the business world.

She has taken a job—possibly it is a position—in a London west end real estate office.

It may be assumed that the Hon. Phyllis is a capable young woman who will be able to make herself of use in the office referred to and that her services will be of value to the concern hiring her.

One might imagine that she might be in a few of those standard observations about the nobility of work, the waste and wickedness of idleness and all that sort of thing.

But we can't get away from the thought that there must be a lot of jobs in London who need that job much more than does the Hon. Phyllis. We do not understand that there is any lack in the Astor lands, and by the way, this is a thought that has a wider application than to the case at hand.

What's In A Name

Much To A Paper

When the London Sunday News stopped publication a couple of weeks ago, not even the members of its staff knew that this was about to happen.

The paper had formerly been *The Weekly News*, a great popular favorite in London, and it was in England to reach the million in circulation. It was at the top of its popularity when it was purchased by a Londoner named Frank Lloyd.

After a certain period the family name should be dropped from the title. The purchaser agreed to this, not knowing the supreme importance of an established name in a case like that. The readers of Lloyd's could not find it on the news stands. They did not know the Sunday News from a dozen others. By changing its name the paper went down and out.

May Scrap the Battleship

British suggests Disarmament Proposal to United States

In anticipation of the Geneva disarmament conference next winter, British statesmen have renewed their suggestion that the United States join with them in abolition of the battleship, it is learned.

British statesmen say the battleship has lost its major usefulness, that it is the greatest source of expense in naval budgets, and the best place to which to effect large economies at one stroke.

An Effacious Household Remedy

Douglas' Eucalypti Liniment. Brings immediate relief to lame back and aches and rheumatism. Also relieves inflammation, burns, sores, corns and warts.

Canada's Wool Clip Inadequate

Canada's total wool clip is about 25,000 pounds, annually, which compares with the clip of the United States, which is about 100,000,000 pounds.

Canada's clip is at least twice as much as this every year and Canadian consumption of manufactured wools is about four times the clip.

The pen is mightier than the sword and not as expensive.

Designed by German Aviator Has Remarkable Flying Qualities

An airplane without a tail, designed by Captain Hermann Kober, transatlantic flyer, has been demonstrated before representatives of the ministry of transportation.

It has a wingspread of only 45 feet and is driven by a 28 horsepower motor. Its sponsors claim, it has shown much remarkable flying qualities that it may prove to be a turning-point in aeroplane construction.

The pen is mightier than the sword and not as expensive.

Aspirin Tablets. Take enough to bring complete relief. Aspirin can't hurt anybody.

Men and women bent with rheumatism will find the same wonderful comfort in these tablets. They aren't just for headaches or colds! Read the proven directions covering a dozen other ailments: neuritis, sciatica, lumbago; muscular pains.

Cold, damp days which penetrate to the very bones have lost their terror for those who carry Aspirin tablets with them! All drug stores, in the familiar little box:

SASKATCHEWAN WEE
EXPERIMENTAL FARMS

(By S. H. Vigor, Saskatchewan Field

Crops Commissioner)

The weed menace in Saskatchewan

has become so acute, and definite

perennial work on weed control has

been so limited, that the Saskatch-

ewan Government deemed it advan-

tageable to institute definite experimen-

tal and demonstrational work on the

control of weeds for the benefit of the

farmers of the province. Consequently

in the spring of 1929, the Saskatch-

ewan Department of Agriculture

organized a provincial program

of research work for the study of

weeds and control methods and

problems. This work was placed

under the direction of Dr. L. E. Kirk,

of the University of Saskatchewan.

In 1929, land was secured at

Drinkwater, for the study of wild

mustard, wild oats, and wild

Canada thistle. The years 1929 and

1930 were exceedingly dry; but the

results obtained were negligible; but

the experimental work was steadily

organized and much valuable ex-

perience was secured. In the spring of

1931 this work was transferred to

the newly-organized Dominion Ex-

perimental sub-station at Regina.

In the spring of 1930, the Saskatch-

ewan Government secured a section

and half of Lockwood, this farm

was heavily polluted with wild oats,

Canada thistle, perennial sow-

thistle, and couch grass, besides other

weeds. The couch or quack grass had

become introduced with broom grass

and had taken possession of a large

portion of the pasture. The soil on

this farm is light and drifts easily

thus complicating the problem of weed

control.

When the farm was secured in 1930,

most of the seeding had been com-

pleted. Weeds and soil drifting in

from the adjacent fields had caused

considerable damage, and a lot of the

crop was cut for feed on account of

wild oats and other noxious weeds.

This was for the first time during the

winter months to a carload of steers bought

in the Moose Jaw stock yards.

Soil Drift Checked

The immediate problem was to prevent

soil drifting. This was done by

sowing fall rye in a large area. This

was the best method of preventing soil

drift, and had been disposed of as seed.

The soil drifting in the Lockwood

tract was worse in the spring of 1931

than in 1930, but not so bad as in

1929. The soil drifting in the Lockwood

Champion Grocery

Our Grocery has been a real success so far. May I express my appreciation to all. I have noticed that Champion Community is trading at home and many more coming a long distance from our surrounding districts to do their shopping. We hope to be able to keep the good work up and do our best to serve you to the best of our ability.

Local and General

The choir will meet at home of Mr. and Mrs. Orr on Friday evening at 7.30.

Ladies one strap Patent Leather Shoes, all sizes, per pair \$2.45 at McCullough Bros.

We shall have another set of slides in the near future on "Where the Great Peace River Flows"

The Champion Meat Market made a record by disposing of 500 pound cartons of lard over the week end.

H. Poirer of Calgary, representing the Mutual Life Insurance Co., was in town some days this week.

Mr. and Mrs. Levi Ayotte and family returned to Champion recently after an extended tour through the States.

Don't forget that the girls of the junior C.W.L. are serving lunch at the dance on Friday night. Go hungry and eat often.

Word was received of the safe arrival in Victoria of Mr. and Mrs. Melvin Granlin, who will spend the winter in the coast city.

W. Harris, formerly with J. M. Moffatt, is in charge of the mechanical end of the business in the garage recently re-opened by I. Granlin.

Mr. and Mrs. Horace Gill and Miss Flo drove to Keith on Sunday where they found Miss Ena Gill making satisfactory progress.

Don't forget the "Dance Supreme" in the Community Hall on Friday, Oct. 9th, with Len Davis Royal Arcadians supplying the music.

Mr. and Mrs. Ole Sletto, Mr. and Mrs. Fallquist and daughter, Marylin, motored from Spokane last week and will be guests of relatives here for a time.

A shooting match in which 60 large turkeys are involved will be held at Harry McNaughtons farm on Saturday, Oct. 10th, commencing at one o'clock sharp.

Mesdames Beaubier, Moffatt, McIntyre, O. Harper, Hagerman and Clements, and Miss Hagerman of Parkland, attended the O.E.S. Chapter at Lethbridge on Monday.

K.R. McLean, R.O., of McLean & Anderson, Sight specialist, 224-8th Ave West, Calgary will make his monthly visit to Champion, Friday, October 30, at the Drug Store.

Miss Ethel McDougall is teaching north of Edmonton.

The Board of Managers will meet on Tuesday evening at 8 o'clock in the parsonage.

A. M. Watt and family leave for Scotland shortly on a three months' vacation, and H. T. Lamont, now of Taber, will return to Champion to take charge of the bank.

A minstrel show will be staged in the Community hall on Friday November 27th under the auspices of the board of management of the United church. Local talent will form the casts.

Fairbairn & Clarke, barristers and solicitors, Lethbridge, announce that they are opening an office in Champion for the practice of law and may be found at the office of Herbert Cooper each Saturday afternoon.

The Women's Institute will meet at the parsonage on Tuesday Oct. 13th at 2.30 p.m. The program will be in charge of the convener, Mrs. Wm. Subj. Canadian Industries. Roll call—An Alberta Industry. Refreshment convener, Mrs. W. Ulrich.

There were 1,239,886 motor vehicles registered in Canada at the end of 1930, an increase of 41,249 over the total registration at December 31, 1929. The "automobile density" of Canada is one motor vehicle for every eight persons in the Dominion.

Burleigh Grimes of the St. Louis Cardinals held the Philadelphia Athletics to one hit in the first eight innings of the world series on Monday and missed an all time world series record by walking Cochrane in the ninth inning after two were out and two strikes were on Cochrane. A home run by Simmons then scored two runs, but Fox was retired on strikes to end the game.

To Look Over Peace Country

Max, James and Gerald Groves, Andy Duniface and Milt Wellings left for Peace River on Thursday, where they will look the country over with a view of taking up homesteads.

Mr. and Mrs. L. J. Adams left on Wednesday to spend a week in Calgary.

Stores and Elevators Close on Monday

Monday, Oct. 12th, being Thanksgiving Day, all the stores in Champion will be closed all day. The elevators will also close on this occasion.

Box Social, Dance At Sanderson

A box social and dance has been arranged to take place in the school on Friday, Oct. 10th. Music for the dance will be furnished by the Fraser orchestra. A big time is anticipated.

VILLAGE OF CHAMPION

Tax Recovery Act 1929

The sale of lands as advertised under the above Act was adjourned until Saturday Oct. 10th, 1931 at 2 p.m. in the Village office

H. COOPER, Sec.-Treas.

VILLAGE OF CHAMPION

Early Closing By-Law

Notice is hereby given that a petition has been presented to the Council of the Village of Champion under the provisions of the Early Closing Act praying for the passing of the following closing by-law.

The Municipal Council of the Village of Champion duly assembled, enacts as follows:

1. All shops throughout the whole area of the Village of Champion, in the Province of Alberta, wherein the retail trade of groceries, hardware and general merchandise, or any of them is carried on, shall, subject to the following proviso, be closed for the serving of customers at and after the hour of six o'clock P.M. on business days, except Wednesdays and Saturdays, the closing hour on Wednesdays to be One o'clock P.M. and on Saturdays not later than 11.30 o'clock P.M. each week, between the First day of October and the Thirty-first day of July inclusive in each year, on which days (namely, from August 1st to September 30th) such shops shall be closed for the serving of customers not later than nine o'clock P.M. Mondays to Fridays inclusive, and not later than 11.30 P.M. on Saturdays.

Provided that six o'clock and one o'clock closing hours shall not be effective on the week days immediately preceding a statutory or other holiday.

DOONE AND PASSED in Council this.....day of.....1931.

Notice is hereby further given that objections to the petition presented to the council praying for the passing of such by-law on the ground that such petition is insufficiently signed or otherwise affecting the validity or sufficiency thereof must be filed with the secretary-Treasurer of the Village on or before the Ninth day of November 1931, and that if no such objections are filed before the said date the council will forthwith proceed to pass the said closing by-law.
